

For assistance in locating the nearest Goodyear EMT Service Center, call the Goodyear EMT Service Locator System at 1-800-786-3528.

For assistance in locating the nearest Goodyear Retailer, call 1-800-GOODYEAR or look in the Yellow Pages under Tire Dealers.

**If additional assistance is required:**

In U.S.A. call the Goodyear Customer Assistance Center at 1-800-321-2136, or write:

Goodyear Customer Assistance Center  
Dept. 739  
1144 East Market Street  
Akron, OH 44316-0001

In Canada call 1-800-387-3288, or write:

Goodyear Consumer Relations Department  
450 Kipling Avenue  
Toronto, Ontario M8Z 5E1

## **TREADWEAR INSPECTION:**

Inspect your tires regularly (for example, each time inflation is checked) for sufficient depth in the tread grooves. This can be done visually very quickly because your tires feature treadwear indicators (raised areas in the bottoms of the grooves) at several locations around the tire. When the tread material has worn down to these indicators, 2/32" of tread groove depth remains and the tire must be replaced. Any signs of uneven or irregular wear may indicate the need for a vehicle alignment.

## **TIRE/WHEEL DAMAGE INSPECTION:**

Inspect your tires for signs of damage to the tread or sidewalls. Foreign objects embedded in the tread or torn or missing chunks of rubber in the tread or sidewall may indicate a potential problem.

At the same time, examine your wheels for signs of damage or abuse. A bent, dented or cracked wheel should be replaced and the tire mounted on it should be inspected thoroughly for damage.

## **TIRE REPAIR:**

Like any other Goodyear speed-rated high performance tire, the Goodyear EMT tire may be repaired to correct a nail-hole puncture in the tread, but proper materials and procedures must be used. Contact an authorized Goodyear EMT service facility for information on proper repairs.

## **SAFETY WARNINGS:**

Serious injury or death may result from:

- **TIRE FAILURE DUE TO UNDERINFLATION/ OVERLOADING.** Consult your vehicle Owner's Manual or the tire placard on the driver's door edge for your vehicle's tire inflation and load specifications.
- **TIRE FAILURE CAUSED BY EXCESSIVE OPERATION AT LOW OR ZERO INFLATION PRESSURE.**
- **EXPLOSION OF TIRE/RIM ASSEMBLY DUE TO IMPROPER MOUNTING.** Only specially-trained persons should mount tires. More than 40 psi (270 kPa) may be required to seat beads. A safety cage and clip-on extension air hose must be used if more than 40 psi (270 kPa) is needed to seat beads.

## **SAFETY WARNINGS:**

On slippery surfaces such as snow, mud and ice, never spin tires in excess of 35 mph (55 km/h) as indicated on the speedometer. Severe damage – including tire disintegration and axle failure – may result from excessive wheel spinning, and could cause serious personal injury.

Goodyear EMT tires are designed for use only on certain original equipment wheels supplied with a properly operating low tire inflation pressure warning system. If applied to a vehicle other than a so-equipped vehicle, the tires may fail when operated in an underinflated condition, which could result in loss of vehicle control and possible serious injury or death. Application of these tires to a vehicle not equipped with specified original equipment wheels and an operational low tire inflation pressure warning system constitutes improper and unsafe use of this product.

## **WHO IS ELIGIBLE FOR WARRANTY COVERAGE?**

You are eligible for the benefits of this limited warranty if you are the owner or authorized agent of the owner of new Goodyear Extended Mobility Technology (EMT) tires. The tires must bear legible Department of Transportation prescribed tire identification numbers and have been used only on the vehicle on which they were originally installed according to the vehicle manufacturer's or Goodyear's recommendations.

## **WHAT IS COVERED AND FOR HOW LONG?**

### **1. FREE TIRE REPLACEMENT**

Any new Goodyear Extended Mobility Technology tire removed from service due to a covered warranty condition or rendered not repairable due to a road hazard injury during the first 2/32" treadwear or 12 months from date of purchase, whichever occurs first, will be replaced at no charge. Mounting and balancing are included. Repairable punctures will also be repaired at no charge during this period. Without proof of purchase, date of manufacture will be used to determine age.

### **2. PRORATED ADJUSTMENT**

A tire not eligible for no-charge replacement that is removed from service due to a covered warranty condition or rendered not repairable due to a road hazard injury will be replaced on a prorated basis. Replacement price will be calculated by multiplying the tire's advertised retailer selling price at the time of adjustment by the percentage of usable original tread that has been worn off. You pay for mounting, balancing, applicable sales tax and the cost of puncture repair, if applicable.

## ADDITIONAL PROVISIONS

A tire has delivered its full original tread life and the coverage of this warranty ends when the treadwear indicators become visible, or six (6) years from the date of original tire manufacture or new tire purchase date, whichever occurs first. Without proof of purchase, date of manufacture will be used to determine age.

To maintain the maximum speed capability and performance of your vehicle, any Goodyear EMT tire should be replaced with another Goodyear EMT tire of identical size and speed rating.

Any replacement tire provided pursuant to this warranty will be covered by the Goodyear warranty in effect at the time of replacement.

## LIMITATIONS

This limited warranty is applicable only in the United States and Canada.

No representative or retailer has authority to make any representation, promise or agreement on behalf of The Goodyear Tire & Rubber Company except as stated herein.

## WHAT IS NOT COVERED BY THIS WARRANTY?

- The Goodyear Tire & Rubber Company does not warrant or give credit in any adjustment transaction for any kind of material added to a tire (e.g., tire fillers, sealants, balancing substances) after the tire leaves a factory producing Goodyear tires, nor will it adjust any tire that has failed as a result of adding such material.
- Tires submitted for ride disturbance complaints that are worn beyond the first 1/32" tread depth.
- Tires not serviceable because of deterioration resulting from operation at low or zero inflation pressure.
- Irregular wear or damage due to mechanical condition of the vehicle, improper inflation, overloading, high speed spin-up, misapplication, misuse, negligence, racing, use of tire chains, improper mounting or demounting, improper repair, wreck, collision or fire.
- Any tire that, after leaving a factory producing Goodyear tires, has been intentionally altered to change its appearance (e.g., white inlay on a black tire, regrooving or siping).
- Tires with weather-cracking that were purchased more than four (4) years prior to presentation for adjustment or, if purchase date cannot be verified, manufactured more than four (4) years prior to presentation for adjustment.
- Loss of time, inconvenience, loss of vehicle use, incidental or consequential damages.

## WHAT ARE YOUR LEGAL RIGHTS?

The Goodyear Tire & Rubber Company disclaims any liability for incidental, or consequential damages to the extent permitted by law. Some states and provinces do not permit the exclusion or limitation of incidental or consequential damages, so this limitation or exclusion may not apply to you.

Any tire, no matter how well constructed, may fail in service or otherwise become unserviceable due to conditions beyond the control of the manufacturer. This warranty is not intended as a representation that a tire failure cannot occur.

This warranty gives you specific legal rights, and you may also have other rights that vary from state to state and in Canada from province to province.

## OWNER'S OBLIGATIONS:

1. You must present the tire to be adjusted to an authorized Goodyear EMT service facility. Tires replaced on an adjustment basis become the property of The Goodyear Tire & Rubber Company or Goodyear Canada Inc.
2. You must pay for taxes and any additional services you order at the time of adjustment.

No claim will be recognized unless submitted on a Goodyear approved claim form (supplied by a Goodyear Retailer) completely filled out, signed by you and where you, the owner or your authorized agent presented the tire for adjustment.

**WARNING:** Vehicle handling, traction, ride comfort and other performance parameters may be significantly affected by a change in tire size or type. Before replacing tires, always consult and follow the vehicle owner's manual because some vehicle manufacturers prohibit changing tire size. When selecting tires that are different from the original equipment size make certain: (1) The tires have adequate load carrying capacity based on the vehicle placard, (2) The tires have sufficient inflation pressure to carry the load and (3) There is proper clearance with no interference points between the tire and vehicle. The consumer must be aware to always drive safely and obey all traffic laws. Avoid sudden, sharp turns or lane changes. Failure to follow any of these warnings may result in loss of control of the vehicle, leading to an accident and serious injury or death.
